We are working to bring the 5 string version of our coveted first LE to members. G&L has begun the protoype build at the Fullerton plant. Matt Desilva wanted to make sure that the single coil option works as expected. This LE will be different. We are offering options for the finger board woods. These include, fretted rosewood, fretted maple, or fretless ebony. You can read more about it by clicking the link below. Pre orders are looking very promising, and the order window should be opening around the end of November.
